# CASE-11

A 67 year old suicidal man with a cancerous growth on his lip, (sphere of 2 cms) was originally prescribed Condurango based on the excessive saliva, mouth ulcers, with burning pain. He was also prescribed Kali Chlor trituration as a mouth wash. The changes were minimal and further case taking revealed his tobacco chewing habit of 30 years, burning pain which aggravates at night, sensitivity to light and his very irritable behaviour, in a hot constitution. Aurum Iod 30C was given and we look forward to change.

Note-Condurango covered the situation but was less effective as a therapeutic prescription whereas the dispensing of Aurum Iod addressing the totality will act more efficiently.

## ■ CASE-12

Recto-sigmoidal cancer in a man aged 50. Blurred vision, sexual debility, poor appetite, passive rectal bleeding. Chilly patient who desires fresh air. He arrived at the clinic after chemotherapy treatment failed to give much improvement and exacerbated his weakness. After 4 months of Pulsatilla LM1 he is walking again and his markers have reduced from 17.0 to 6.84 u/ml. His passive attitude with a Syco-Tub miasm made the prescription by 'look and diagnose' Such is the confidence of the Drs Banerjea.

## ■ CASE-13

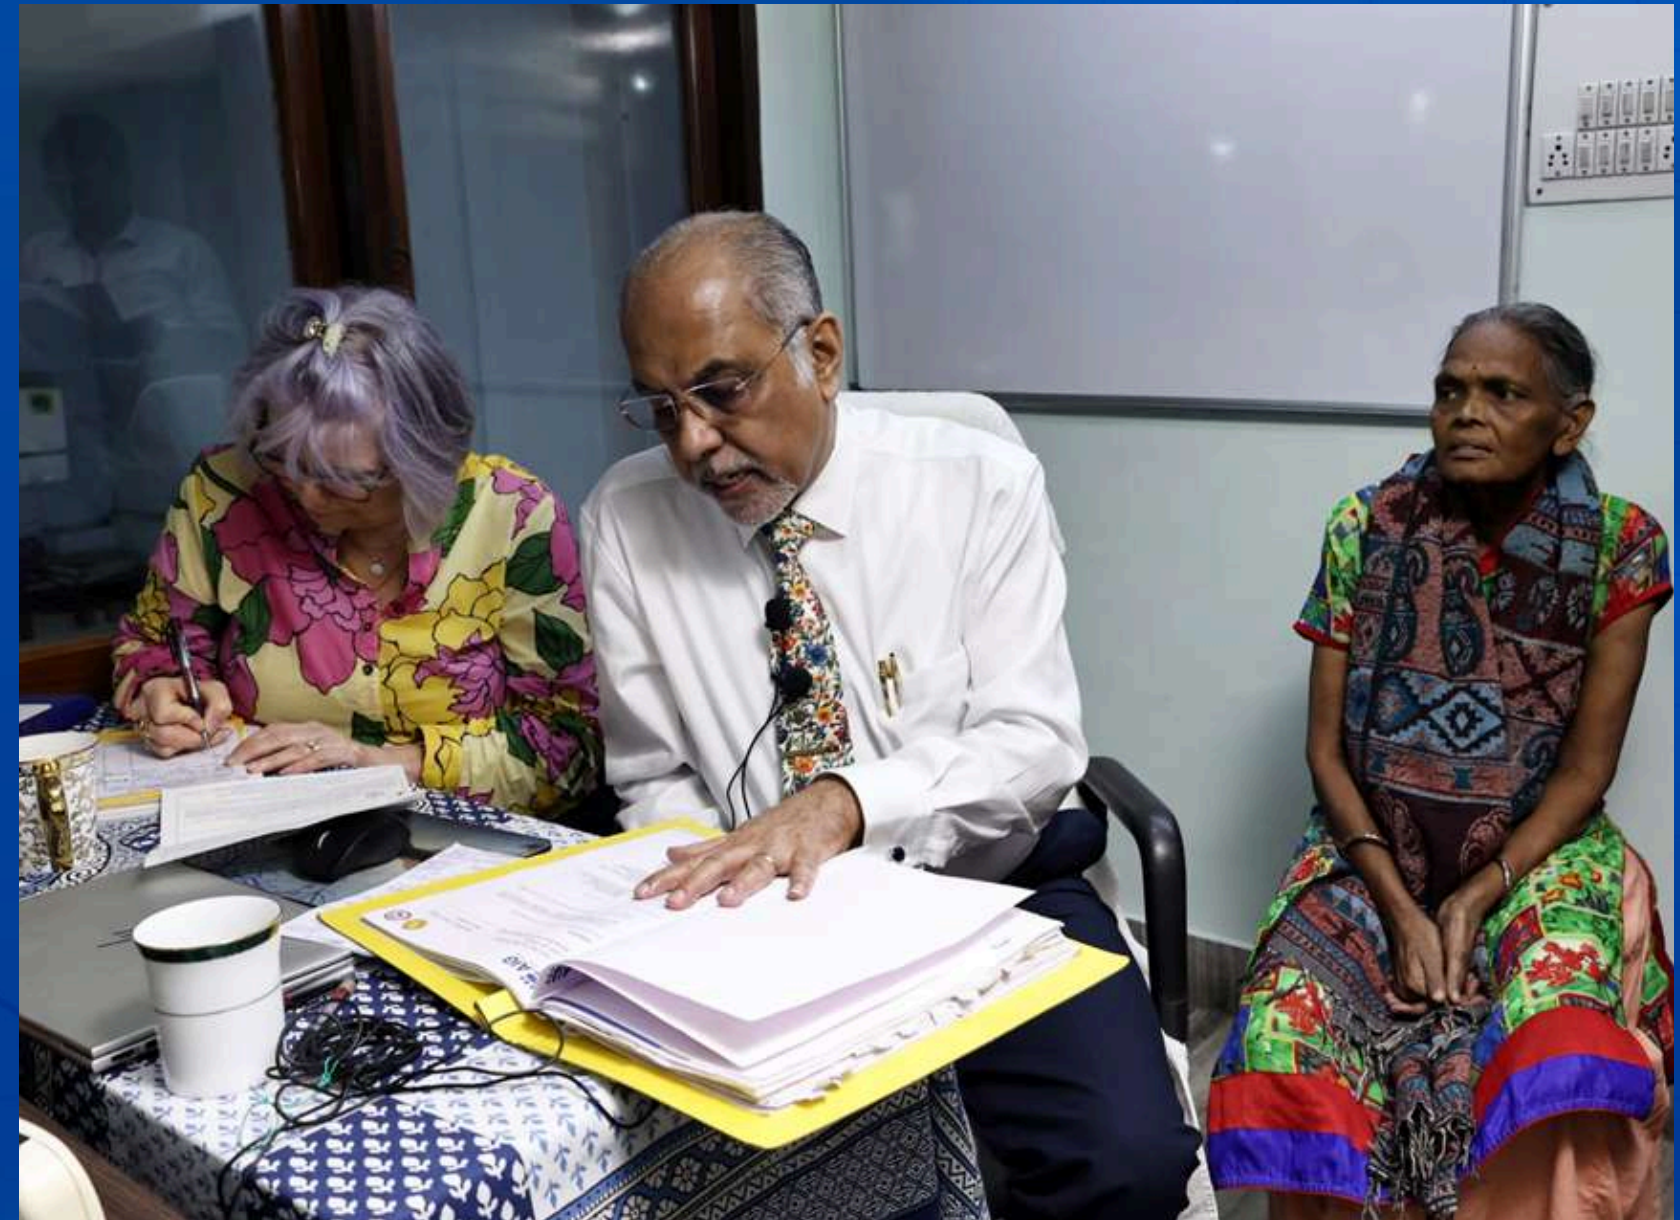

Tongue and cervix ulcer. 30 year old hot, female presented with generalised ulceration indicating the syphilitic miasm on the surface. She is a hot patient who suffers from anxiety. Her mouth odour, delayed healing, excess saliva, suspicious nature gave the impression of Mercurius Sol. There was change in the ulceration which then revealed a second layer of sun headache, frequent cold and cough in the cold(er) days, with abdominal bloating. Bacillinum was the next choice in the treatment plan to address the sycosis along with the weakness in the respiratory system. She reports 50% fewer coughs and colds since the Bacillinum. Her ulcers continue to decrease and are hardly of consequence.

# | CASE-14

A striking success. A 71-year-old woman has been diagnosed with Cholangio Cancer. (Bile duct cancer) The USG of the abdomen report said there was luminal sludge, polycystic kidneys and cholangitis. Possible unconfirmed metastasis. Symptoms present were debility, drowsiness, jaundiced appearance, cramp at stool, better after a stool in a chilly patient. Yellowness of the eyes. Desires spicy food. 14<sup>th</sup> February 2025 -One dose of Nux Vomica 6C followed by 30C has achieved- (according to an allopath in the class- the impossible) Bilirubin from 26.9 to 3.1 and cancer marker reduced from 480 to 26, a cheerful grandma returned to the family, without her allopathic drugs.

Note- The tubercular aspect of Nux Vomica should control any further metastasis. Two potencies were given, 6C to revitalise the patient as she was on heavy allopathic drugs, followed by 30C to address the condition and further the action of the 6C.

# CASE-15

18<sup>th</sup> month baby who is presenting with neck and limb atrophy and subsequent weakness. Cannot stand or hold the head up. Delivery was by C section at 37 weeks. (Common, with no ascertainable reason given) Hot palms and soles as well as hot patient desiring cool air. Easily catching colds and coughs. Likes sweet food. Reacts to mosquito bites with large swellings and itch. Congenital muscular dystrophy is the allopathic diagnosis. Sulphur 30C was given and soon afterwards she attempted to crawl for the first time, previously she had not attempted to move. The parents would like more strength in the neck to enable her to hold her head up. This would make her mealtimes considerably easier and help her to learn to crawl. The next medicine to be considered is Abrotanum. (Marasmus, marked emaciation, weakness and prostration, unable to stand, old looking).

Note- Chronic Muscular Dystrophy refers to a group of more than 30 genetic conditions that cause muscle weakness and other muscle-related symptoms. The homoeopathic treatment will enhance her life.

## ■ CASE-16

48-year-old heavily built man with distension of abdomen, three stools a day. Diagnosis of Cirrhosis of the liver. Tearing pain and sensitivity to drafts and touch. The case was started with Cinchona 30C and 9 months later after 1M was given, reporting 50% improvement, a change of prescription was required. The debility, gas and distension, history of disappointment indicated Phos Acid 30C. Slow but steady improvement of these symptoms. Then the patient had an injury to the shoulder and Ruta 30C followed by Ruta 200C improved the injury to 100% better.

## ! CASE-17

A Diagnosis of Multiple Sclerosis which was diagnosed by MRI Scan showed demyelination in the spinal cord and peripheral nerves. The patient, a young man aged 28 years reported trembling of the hands. Upon thorough case taking, it transpired that he had a group of friends who were taking recreational drugs and he joined in. After some time, he realised this was not the lifestyle he wanted and after stopping the drugs the 'friends' rejected him. He agreed that this could be called 'disappointment of love'. He subsequently felt lonely, weak, debilitated and depressed. Phos Acid 30C followed by 200C improved him considerably. His concentration and self-worth have increased and the whole outlook for the case looks promising. On observation it was noted that his trembling had disappeared.

## | CASE-18

A man of 37 years reported waist pain with tingling. A history of a sprain while overlifting was recorded but he deemed himself fit from this injury some years before. His current nerve pain resulted from a fall from a tree (he is a farmer). Bellis Per 1M followed by 10M has cured the problem, he reported 100% better. This amount of improvement was over 4 months with steady improvement. One prescription only.

Note- Due to the robust nature of the patient and the nerve damage higher potencies were utilised for 'rapid cure'.

## I CASE-19

Chronic sprain, in a 54 year old woman she has been suffering with stiffness and difficulty walking since an accident 25 years ago. Strontia 30C and 200C was given considering she felt nauseas with a chilled feeling. Some mild itching of the skin confirmed the third aspect of the case with relief from hot application, finalising the prescription.

Note- Two potencies as there is clear aetiology.

# CASE-20

Emaciation of limbs in a 69-year-old man. Contraction, constipation (lumpy stool) and emaciation were the leading features of the case in a depressed person, with sunken face. Lethargy was very evident too. Plumbum Metallicum has improved a little since the first prescription in mid-February 2025.

Note- As the patient has improved, even a little, the prescription required was a Boost. This unmedicated sachet will give him confidence and value for his appointment, not only in the investment of a long journey but the consequence of attention by a large group of homoeopaths present at his consultation. To dismiss him without more sachets would be most disappointing for him.

In conclusion, the variety and intensity of this one day in clinic should have satisfied all the participants. Plentiful notes should accompany them home, not only the practical implementation of miasm, tinctures to support organs and wean from allopathic drugs but the depth and capacity of the potentised medicine cannot be denied. It would be a good spend of public money for RT. Hon. Wes Streeting MP Secretary of State and Karin Smyth MP (U.K) to observe homoeopathy at this depth.

Janet Banerjea RSHom 2nd March 2025

## Photos

**Participants from the United Kingdom, France, Greece, Japan, Brazil etc. and some Indian Doctors attended the programme.**

Various advanced pathologies are seen & discussed.

Tumours & scope of homoeopathy.

Many Autistic & ADHD cases were seen & demonstrated the improvement through "Simple Classical Time tested Hahnemannian-Kentian Homoeopathy". This course takes you back to the foundations and principles through which homoeopathy survived 200+ years.

**Participants from the United Kingdom, France, Greece, Japan, Brazil etc. and some Indian Doctors attended the programme.**

**Mrs. Janet Banerjea sharing the importance of supervision with the French Doctor and enthusing other registered homoeopaths from other parts of the globe.**

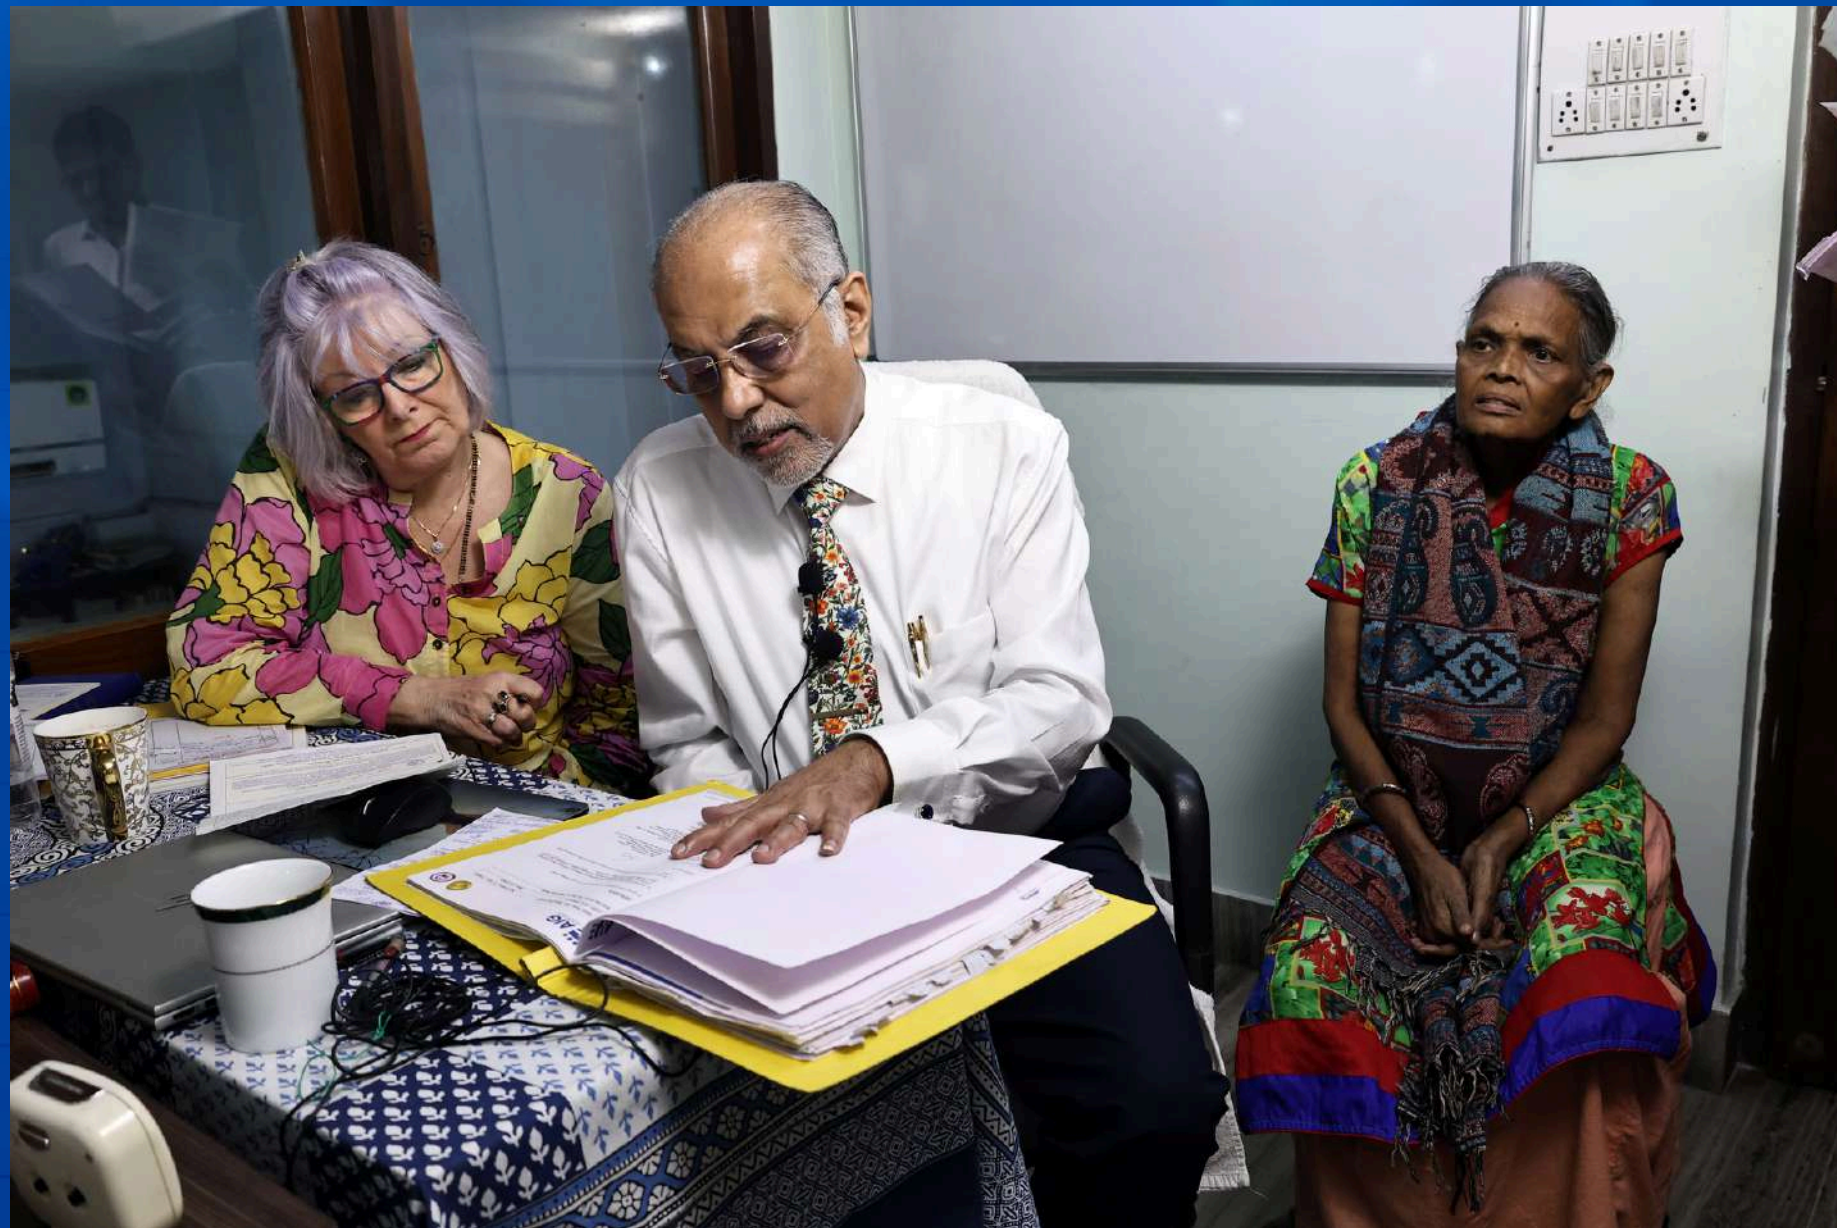

**Autistic case: the demonstration of the improvement through “Simple Classical Time tested Hahnemannian-Kentian Homoeopathy”. This course takes you back to the foundations and principles through which homoeopathy survived 200+ years.**

**Another autistic case & demonstration of strength of homoeopathy, Calcutta Clinical Programme, 2025.**

**Live case demonstration with interpretation of medical reports before and after homoeopathic treatment, demonstration of authenticity of Classical Homoeopathy!**

**Queue of patients to be seen by Dr. Subrata K. Banerjea and Dr. Saptarshi Banerjea. Can be compared with a busy Out Patient's Department of an Allopathic Hospital/ GP's Surgery.**

**Dispensing of the right medicines are of paramount importance, hence one always supervises the making of medicines by others.**

**Queue of patients who are patiently waiting to be seen by Dr. Subrata K. Banerjea and Dr. Saptarshi Banerjea. Average waiting time: 3 to 4 hours. Most of the patients are travelling an average of 500 miles!**

**Dr. Saptarshi Banerjea seeing Patients in his private consulting room, Creek Row, Calcutta.**

**Patients are waiting in the Creek Row Consulting Room of Dr. Subrata K. Banerjea and Dr. Saptarshi Banerjea.**

**Patients are waiting in the Creek Row, Calcutta Chamber of Dr. Subrata K. Banerjea and Dr. Saptarshi Banerjea.**

**Mrs. Janet Banerjea is teaching Aphorism 260 and its current relevance, Calcutta Clinical Programme 2025.**

**Dr. Saptarshi Banerjea is teaching in Calcutta Clinical Programme 2025.**

**Dr. Subrata K. Banerjea is passionately sharing his long experience of adherence to Hahnemannian-Kentian Homoeopathy.**

# Upcoming Calcutta Clinical training Programme 2026

**27TH JANUARY (TUESDAY) TO 6TH FEBRUARY (FRIDAY) 2026.**

PROGRAMME FEES (FOR TUITION ONLY):

£990.00 (BRITISH POUNDS NINE HUNDRED AND NINETY ONLY; FOR EXCHANGE RATE, VISIT: WWW.XE.COM).

PERHAPS THE ONLY PROGRAMME IN THE WORLD, WHICH DEMONSTRATE.  
125+ LIVE NON-EDITED CASES IN 10 DAYS, WHERE LIVE INTERACTION  
WITH PATIENT IS ENCOURAGED
