

Homage To Hahnemann

Special edition of the Newsletter on Hahnemann's 270th Birthday (10th April):

—
Dr. Samuel Christian
Friedrich Hahnemann
—

—
He saw his system of healing rise from contempt to honour; Scholar whom scholars honoured and respected; Physician whom physicians feared; Philologist with whom philologists dreaded to dispute; Chemist who taught chemists, Philosopher whom adversity nor honour had power to change" thus we have a glowing feeling of pleasure & pride that such a versatile genius of prodigious personality was the founder of Homoeopathy, the divine art of healing gifted by gracious God to the suffering humanity. Our Master said: "Non inutilis vixi": I have not lived in vain!
—

**Reiko Mori: Allen College of Homoeopathy, Japan Division,
paying her tribute & spreading our beautiful Art & Science
of Classical Homoeopathy in the country of sun-rise.**
